**Bluefield Services Ltd**  
**Bristol, UK**

Seville/Spain, 12th May 2017

Dear Team,

Please find this cover letter reinforcing my candidature in application for the job position as Head of O&M that you had opened in Bluefield Services Ltd.

I am very interested in the opportunity for career development, with the potential for management roles. I hope that my qualifications directly match with the job requirements and I could join the team approach within professional, administrative and legal support areas.

My career as a Legal Manager had been adapted to my international experience, and I have developed the necessary knowledge to work in different sectors. I have also gained more than four years of work experience in relating to international clients in my position as Legal Manager and In-Company Administrative Manager at International House Seville (Spain) and Sydney.

During my time in Australia I got experience in the Spanish-Australian Chamber of Commerce working alongside companies for the renewable sector (mainly Abengoa and Fotowatio), so I got a lot experience in this sector managing with the incorporation of the company to the country and analyzing all project contracts (EPC contracts, operation & maintenance, supply agreements, security contracts, lease agreements). This knowledge was in progress in Dubai, collaborating with Abengoa as external legal expert in these contracts for Shams project (Thermosolar plant) and developing business for new companies in UAE.

After all this experience abroad I was working in Quintas Energy SL (Seville, Spain), which is a renewable company reference in the solar sector, and I was in charge of a UK Portfolio for solar plants, ensuring compliance of the solar installations with their obligations including those arising from permits, licenses, finance agreements and all the project contracts; monitoring and follow-up all legal incidents, taking the appropriate actions to close them satisfactorily with detailed reporting; dealing with the client's legal advisors where necessary and providing legal support to the technical team.

I am hard-working and responsible and I am able to use my creative skills when problemsolving and teamwork. I consider myself a self-starter, capable of displaying considerable initiative, with a high level of interpersonal skills. I used to work with different Databases.

I sincerely appreciate your time and courtesy in reviewing my application. Please contact me at your earliest so that I may work in this amazing project.

Respectfully yours,
